Department of Information Technology

Academic Year: 2025-26
Semester: VI
Class / Branch / Div: TE- IT C
Subject: MAD & PWA Lab
Name of Instructor: Saylee Lapalikar

Name of Student:Shravani Sawant
Student ID:24204018
Roll No.19
Date of Submission:13/03/26

Experiment No:4

Aim: To Design an interactive Form using various form widgets.

Code:

```
import 'package:flutter/material.dart';

void main() {
  runApp(MyApp());
}

class MyApp extends StatelessWidget {
  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      title: "Student Notes App",
      debugShowCheckedModeBanner: false,
      home: RegisterPage(),
    );
  }
}
```

```
/*  REGISTER PAGE  */
class RegisterPage extends StatefulWidget {
  @override
  _RegisterPageState createState() => _RegisterPageState();
}

class _RegisterPageState extends State<RegisterPage> {
  final _formKey = GlobalKey<FormState>();

  TextEditingController name = TextEditingController();
  TextEditingController email = TextEditingController();
  TextEditingController password = TextEditingController();

  @override
  Widget build(BuildContext context) {
    return Scaffold(
      appBar: AppBar(
        title: Text("Student Registration"),
        backgroundColor: Colors.blue,
      ),
      body: Container(
        decoration: BoxDecoration(
          gradient: LinearGradient(
            colors: [Colors.blue.shade200, Colors.blue.shade700],
            begin: Alignment.topCenter,
            end: Alignment.bottomCenter,
          ),
        ),
```

```
child: Padding(
  padding: EdgeInsets.all(20),
  child: Form(
    key: _formKey,
    child: Column(
      children: [
        TextFormField(
          controller: name,
          decoration: InputDecoration(
              labelText: "Name", filled: true, fillColor: Colors.white),
          validator: (value) {
            if (value!.isEmpty) {
              return "Enter your name";
            }
            return null;
          },
        ),
        SizedBox(height: 15),
        TextFormField(
          controller: email,
          decoration: InputDecoration(
              labelText: "Email",
              filled: true,
              fillColor: Colors.white),
          validator: (value) {
            if (value!.isEmpty) {
              return "Enter email";
            }
            return null;
```

```
  },
),
SizedBox(height: 15),
TextFormField(
  controller: password,
  decoration: InputDecoration(
    labelText: "Password",
    filled: true,
    fillColor: Colors.white),
  obscureText: true,
  validator: (value) {
    if (value!.length < 6) {
      return "Minimum 6 characters";
    }
    return null;
  },
),
SizedBox(height: 25),
ElevatedButton(
  child: Text("Register"),
  onPressed: () {
    if (_formKey.currentState!.validate()) {
      ScaffoldMessenger.of(context).showSnackBar(
        SnackBar(
          content: Text("Registration Successful"),
        ),
      );

      Navigator.push(
```

```
                    context,
                    MaterialPageRoute(
                      builder: (context) =>
                          LoginPage(email.text, password.text),
                    ),
                  );
                }
              },
            )
          ],
        ),
      ),
    ),
  ),
);
}
}

/* LOGIN PAGE  */

class LoginPage extends StatefulWidget {
  final String regEmail;
  final String regPassword;

  LoginPage(this.regEmail, this.regPassword);

  @override
  _LoginPageState createState() => _LoginPageState();
}
```

```
class _LoginPageState extends State<LoginPage> {
  TextEditingController email = TextEditingController();
  TextEditingController password = TextEditingController();

  @override
  Widget build(BuildContext context) {
    return Scaffold(
      appBar: AppBar(
        title: Text("Student Login"),
        backgroundColor: Colors.purple,
        leading: IconButton(
          icon: Icon(Icons.arrow_back),
          onPressed: () {
            Navigator.pop(context);
          },
        ),
      ),
      body: Container(
        decoration: BoxDecoration(
          gradient: LinearGradient(
            colors: [Colors.purple.shade200, Colors.deepPurple],
            begin: Alignment.topLeft,
            end: Alignment.bottomRight,
          ),
        ),
        child: Padding(
          padding: EdgeInsets.all(20),
          child: Column(
```

```
children: [
  TextField(
    controller: email,
    decoration: InputDecoration(
        labelText: "Email", filled: true, fillColor: Colors.white),
  ),
  SizedBox(height: 15),
  TextField(
    controller: password,
    decoration: InputDecoration(
        labelText: "Password",
        filled: true,
        fillColor: Colors.white),
    obscureText: true,
  ),
  SizedBox(height: 25),
  ElevatedButton(
    child: Text("Login"),
    onPressed: () {
      if (email.text == widget.regEmail &&
          password.text == widget.regPassword) {
        ScaffoldMessenger.of(context).showSnackBar(
          SnackBar(
            content: Text("Successfully Logged In"),
            backgroundColor: Colors.green,
          ),
        );

        Future.delayed(Duration(seconds: 2), () {
```

```
                Navigator.pushReplacement(
                  context,
                  MaterialPageRoute(
                    builder: (context) => HomePage(),
                  ),
                );
              });
            } else {
              ScaffoldMessenger.of(context).showSnackBar(
                SnackBar(
                  content: Text("Invalid Login Credentials"),
                  backgroundColor: Colors.red,
                ),
              );
            }
          },
        )
      ],
    ),
  ),
),
);
}
}

/*  HOME PAGE  */

class HomePage extends StatelessWidget {
  @override
```

```
Widget build(BuildContext context) {
  return Scaffold(
    appBar: AppBar(
      title: Text("Student Notes"),
      backgroundColor: Colors.green,
    ),
    body: Container(
      color: Colors.green.shade100,
      child: Padding(
        padding: EdgeInsets.all(20),
        child: Column(
          crossAxisAlignment: CrossAxisAlignment.start,
          children: [
            Text(
              "Available Subjects",
              style: TextStyle(
                fontSize: 22,
                fontWeight: FontWeight.bold,
              ),
            ),
            SizedBox(height: 20),
            ListTile(
              leading: Icon(Icons.book),
              title: Text("Computer Networks"),
            ),
            ListTile(
              leading: Icon(Icons.book),
              title: Text("Mobile Application Development"),
            ),
```

```
        ListTile(
          leading: Icon(Icons.book),
          title: Text("Artificial Intelligence"),
        ),
        ListTile(
          leading: Icon(Icons.book),
          title: Text("Data Warehousing"),
        ),
        ListTile(
          leading: Icon(Icons.book),
          title: Text("Cyber Security"),
        ),
        SizedBox(height: 30),
        Center(
          child: ElevatedButton(
            child: Text("Logout"),
            onPressed: () {
              Navigator.pushReplacement(
                context,
