Subject: MAD & PWA Lab
Name of Instructor: Prof. Saylee Lapalikar

Name of Student:Shravani Sawant
Student ID:24204018
Roll No.19
Date of Submission:30/01/26

Experiment No.:3

Aim: To design a layout of Flutter App using layout widgets.

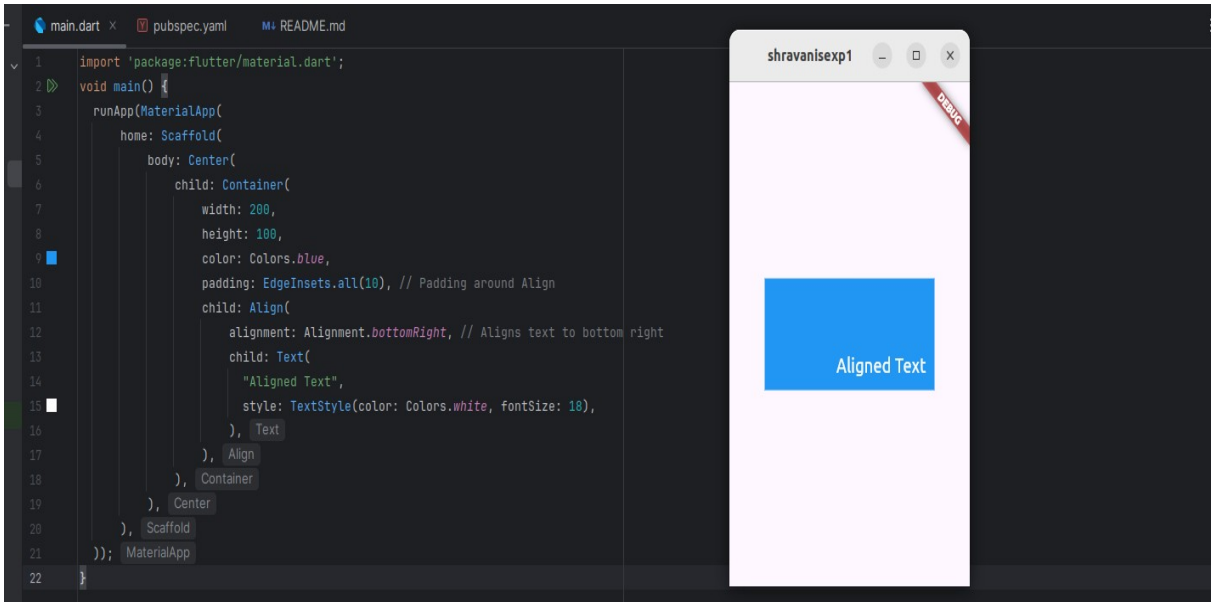
Prerequisites: Android studio, flutter SDK.

Problem Statement: To develop a flutter UI for creating List View using Layout widgets of flutter.

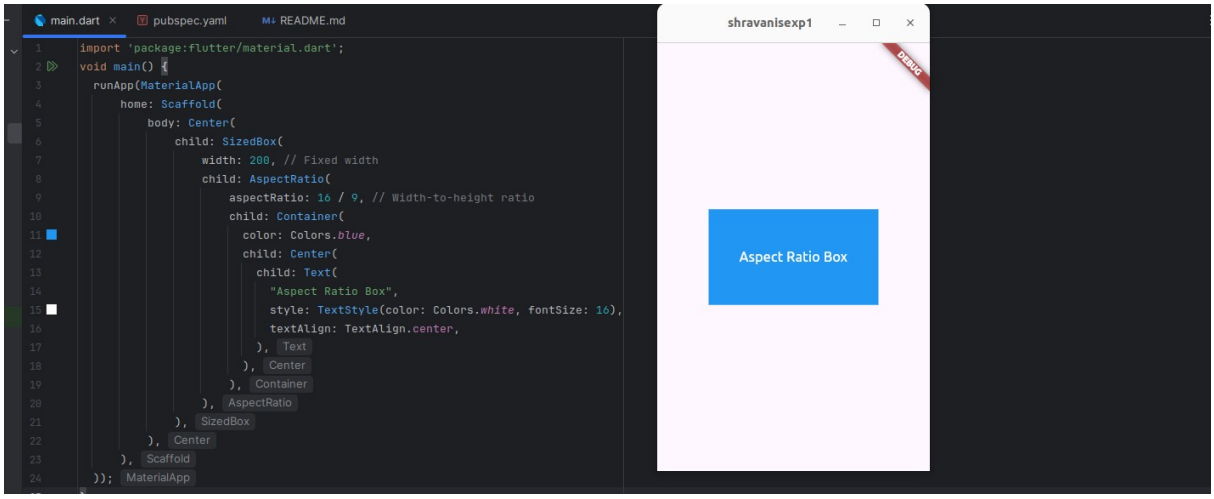
Software: Android studio, flutter SDK.

Outputs:

container(single child)

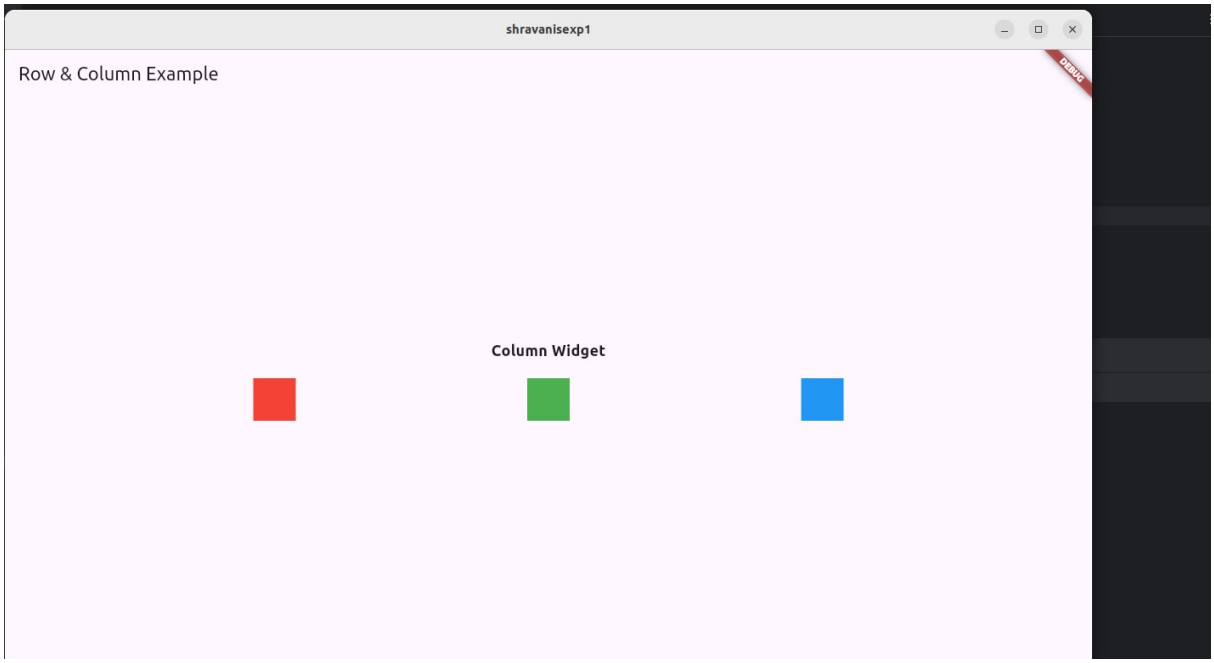


aspect ratio(single child)

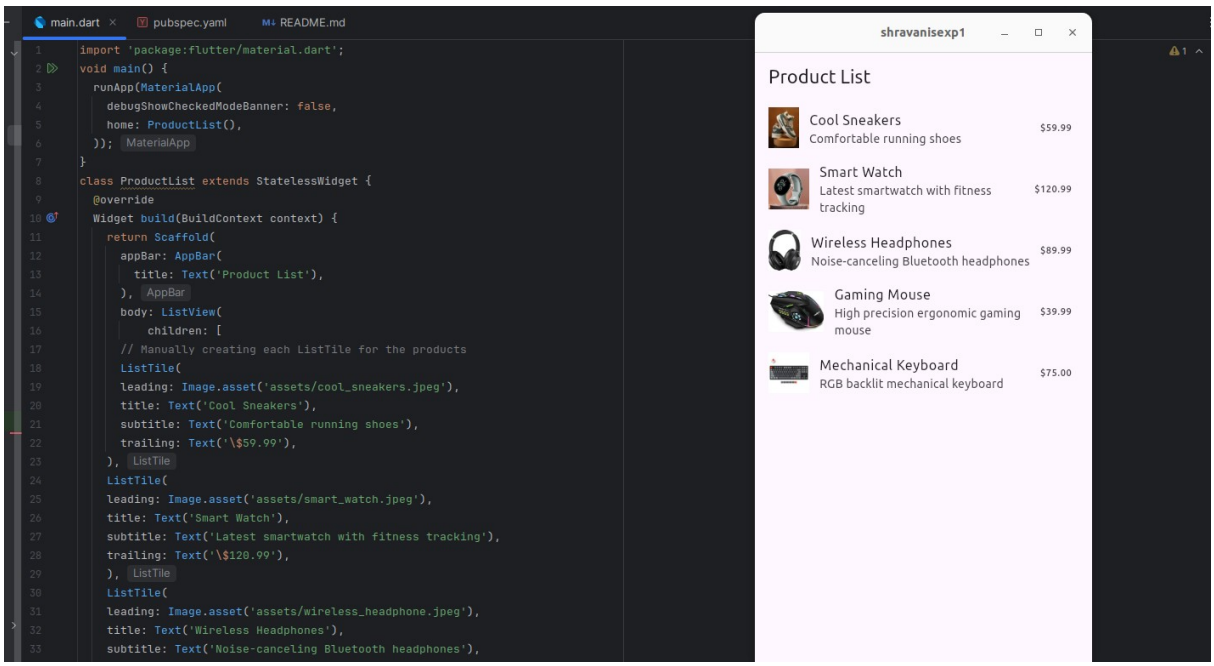


column and row(multiple widgets)

```
import 'package:flutter/material.dart';
void main() {
  runApp(MaterialApp(
    home: Scaffold(
      appBar: AppBar(title: Text("Row & Column Example")),
      body: Padding(
        padding: EdgeInsets.all(20),
        child: Column(
          mainAxisAlignment: MainAxisAlignment.center,
          // Centers content vertically
          children: [
            Text("Column Widget", style: TextStyle(fontSize: 18, fontWeight:
            FontWeight.bold)),
            SizedBox(height: 20), // Spacer between elements
            Row(
              mainAxisAlignment: MainAxisAlignment.spaceEvenly,
              // Distributes children evenly
              children: [
                Container(width: 50, height: 50, color: Colors.red),
                Container(width: 50, height: 50, color: Colors.green),
                Container(width: 50, height: 50, color: Colors.blue),
              ],
            ),
          ],
        ),
      ),
    ),
  ));
```



Complex Layouts(product list



Conclusion: In this experiment we have designed a layout by using flutter various layout widgets.
